ABOUT ME

Highly motivated Backend Developer with 2 years of hands-on experience in PHP Laravel, JavaScript (jQuery), and MySQL, seeking a challenging role to contribute to the development of reliable and scalable web applications. Skilled in backend development, bug resolution, and dynamic web-based reporting. Currently expanding frontend capabilities through self-learning and hands-on practice with Tailwind CSS and React.js, while continuously improving knowledge in modern development practices and backend optimization.

EXPERIENCE

Oct 2023 - Present
One Document Corporation

Junior Web Developer

- Developed robust web applications using PHP Laravel, JavaScript (jQuery), and MySQL to build and maintain system features.
- Resolved bugs listed in issue logs to improve system functionality and user experience.
- Designed and implemented customizable file viewing and printing functionalties, allowing users to talor outputs based on specific data requirements.
- Wrote and optimized stored procedures to support backend processes.
- Collaborated with a small backend team in version control workflows using GitHub.

May 2022 - Jul 2022
ZenGages (Website Testing and Improvement)

IT Intern

- Conducted cross-device and cross-browser testing for identifying front-end issues.
- Collaborated with developers to reproduce, document, and report UI/UX bugs.
- Participated in daily stand-up meetings and contributed to functionality discussions.
- Employed debugging tools and browser console logs to isolate issues.
